

Race Report

2018/5/13 Rd-2 AUTOPOLIS

Weather : Rain Temperature : 21°C 19 cars

Audience : 3,650/ 12th(Sat.)、 4,750/ 13th(Sun) * SF Rd2 race was cancelled

Unlike QF under the fine weather in early summer, Super Formula Rd2 at Autopolis Was held in rain and fog.

Just before the race, the rain became heavier, and the track was partially foggy. The course condition got worse and worse. Since there was no chance of recovery of the weather, cancellation of the race was determined.

#5: Tomoki Nojiri

I am disappointed that the race to start from the 1st position was cancelled due to the bad weather. However, cancellation was the right decision because there are possibilities that drivers might get hurt, car might break, or audience might have an accident under the weather getting worse.

Set up of my car has been good through the weekend.

I will focus to bring this positive condition to SUGO with team strategy.

#6: Nobuharu Matsushita

I felt certain response this weekend. It was supposed to be an important race to dominate the season, but there is nothing we can do for weather.

I am pretty sure that we will be fast at SUGO. We will prepare for the race and take out our frustration.!
